

Earlam's Oesophagoscope

A range of instruments for Inspection, Biopsy, Stricture Dilatation of the Oesophagus and introduction of Palliative Intubation Tubes.

 **seward** surgical

Seward Surgical have worked closely with Mr Richard Earlam, Consultant Surgeon, to develop a new range of instruments for the investigation and intubation of the oesophagus.

As with the Lloyd-Davies Sigmoidoscope from Seward, the oesophagoscope is made of stainless steel with interchangeable parts. The scope has a safe, non-slip handle, specially contoured beak for

easy introduction, graduated outer surface and fitted with distal fibre light illumination, proximal magnifying telescope and inflation bellows.

Available in sets or individual components, there are two basic sizes: 15 mm diameter for inspection and dilatation and 20 mm diameter for dilatation and insertion of palliative tubes.

OESOPHAGOSCOPES

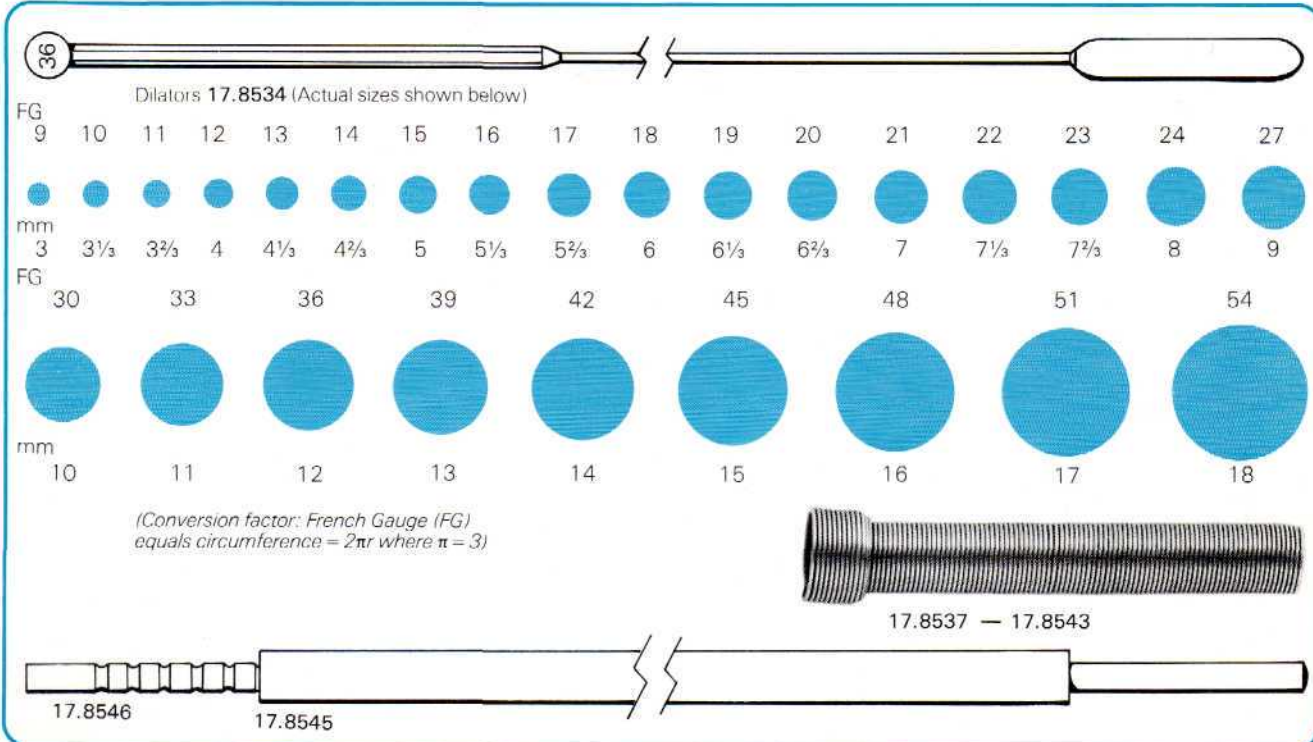

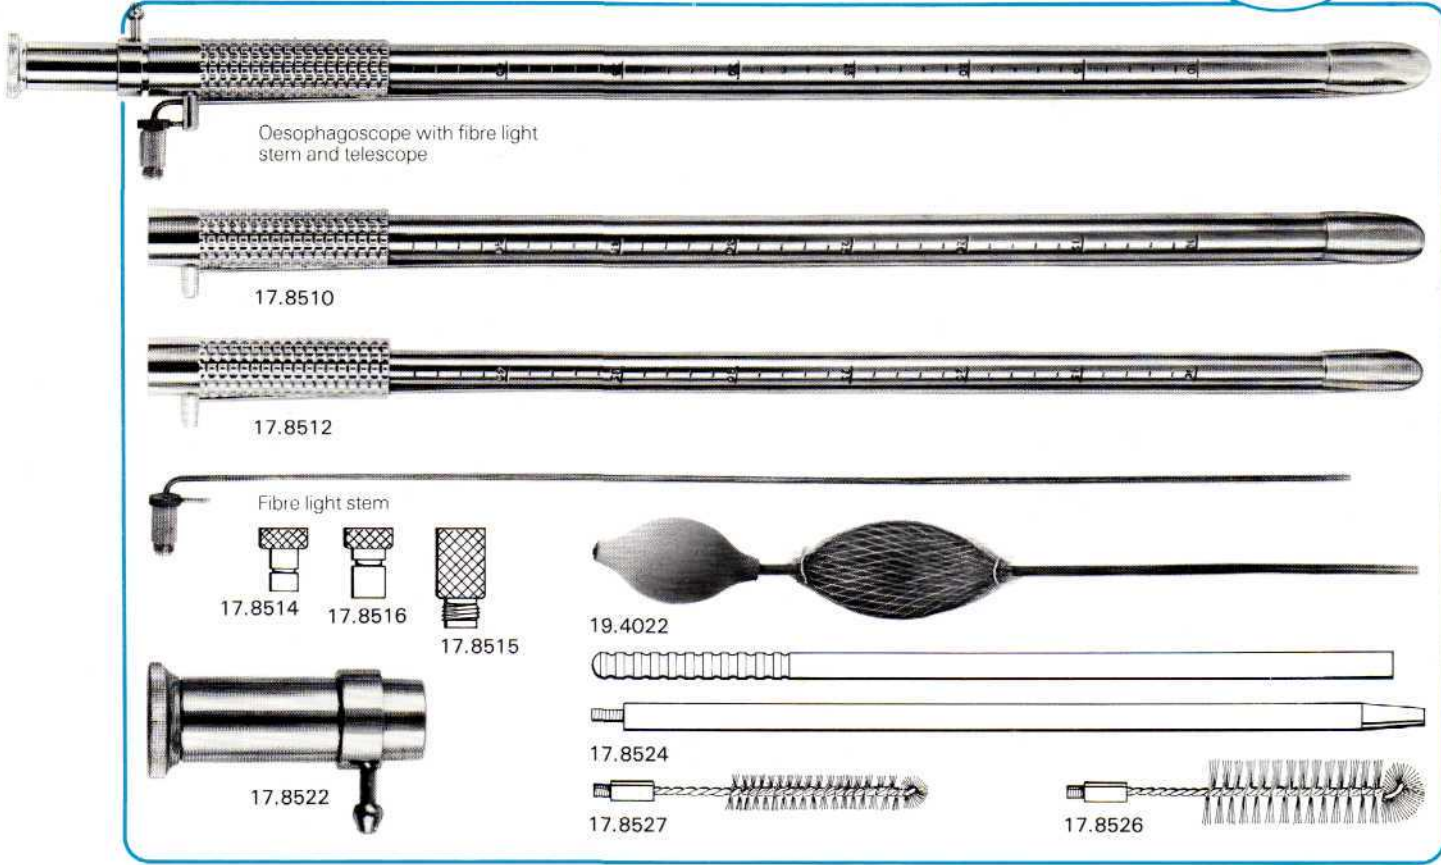

Cat. no.	Description
17.8501	Earlam's Oesophagoscope, Combination Set comprising: 450 mm x 20 mm dia. tube with fibre light stem. 450 mm x 15 mm dia. tube with fibre light stem. Telescope with connection for inflation bellows. Double inflation bellows. Tube cleaning rod with two size brushes. Complete in carrying case.
17.8503	Earlam's Oesophagoscope, Large Set comprising: 450 mm x 20 mm dia. tube with fibre light stem. Telescope with connection for inflation bellows. Double inflation bellows. Tube cleaning rod with one brush. Complete in carrying case.
17.8505	Earlam's Oesophagoscope, Small Set comprising: 450 mm x 15 mm dia. tube with fibre light stem. Telescope with connection for inflation bellows. Double inflation bellows. Tube cleaning rod with one brush. Complete in carrying case.
17.8510	450 mm x 20 mm dia. Oesophagoscope only.
17.8512	450 mm x 15 mm dia. Oesophagoscope only.
17.8514	Fibre light stem with BS4824 removable mount.
17.8515	Fibre light stem with STORTZ removable mount.
17.8516	Fibre light stem with WOLF removable mount.
17.8518	BS4824 removable mount only.
17.8519	STORTZ removable mount only.
17.8520	WOLF removable mount only.
17.8522	Telescope with connection for inflation bellows.
19.4022	Double inflation bellows.
17.8524	Tube cleaning rod in two sections.
17.8526	Brush for cleaning rod — 20 mm tube size.
17.8527	Brush for cleaning rod — 15 mm tube size.
17.8529	Plastic suction tube.

DILATORS AND INTUBATION SETS

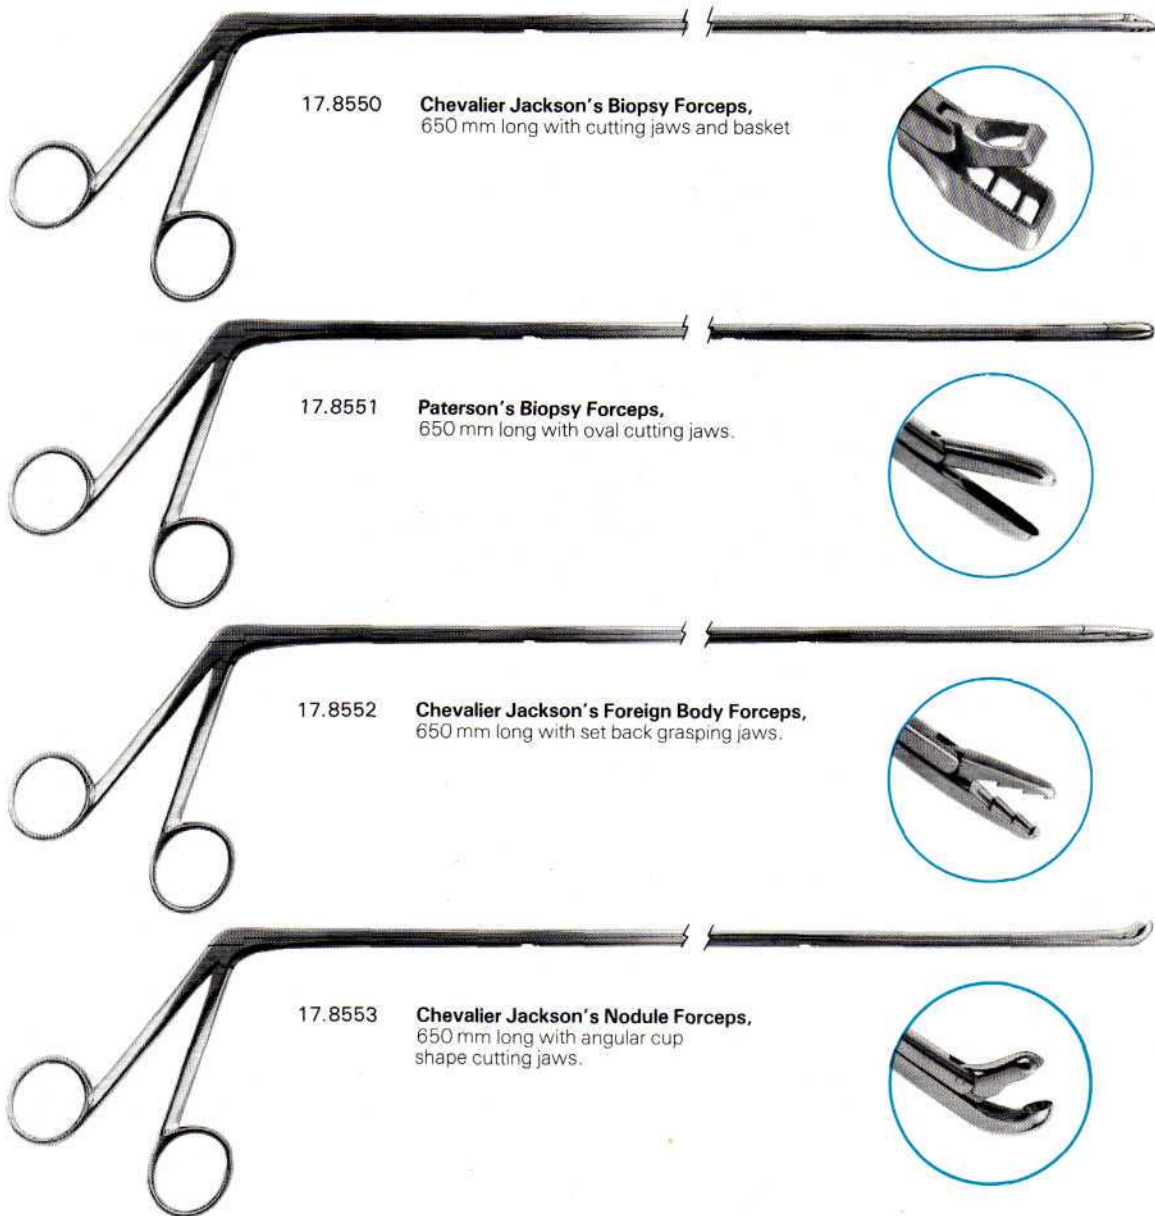

Cat. no.	Description
17.8532	Earlam's Oesophageal stricture dilators , complete set of 30 fitted into slotted linen roll. (Autoclaveable).
17.8534	Earlam's Oesophageal Dilators (See illustration for ACTUAL SIZES) Sizes: 9 FG (3 mm dia.) 18 FG (6 mm dia.) 33 FG (11 mm dia.) 10 FG (3½ mm dia.) 19 FG (6½ mm dia.) 36 FG (12 mm dia.) 11 FG (3¾ mm dia.) 20 FG (6¾ mm dia.) 39 FG (13 mm dia.) 12 FG (4 mm dia.) 21 FG (7 mm dia.) 42 FG (14 mm dia.) 13 FG (4¼ mm dia.) 22 FG (7¼ mm dia.) 45 FG (15 mm dia.) 14 FG (4½ mm dia.) 23 FG (7½ mm dia.) 48 FG (16 mm dia.) 15 FG (5 mm dia.) 24 FG (8 mm dia.) 51 FG (17 mm dia.) 16 FG (5½ mm dia.) 27 FG (9 mm dia.) 54 FG (18 mm dia.) 17 FG (5¾ mm dia.) 30 FG (10 mm dia.) One set of 4 malleable, tapered, filiform dilators without handles.
17.8535	Linen Roll , slotted to hold 30 oesophageal dilators.
	Palliative oesophageal intubation tubes , made of stainless steel wire 1 mm thick.
	17.8537 70 mm x 12 mm dia. 17.8541 150 mm x 12 mm dia.
	17.8538 70 mm x 14 mm dia. 17.8542 150 mm x 14 mm dia.
	17.8539 70 mm x 16 mm dia. 17.8543 150 mm x 16 mm dia.
	(Other sizes made to order, minimum quantity of six.)
17.8545	Introducing tube for palliative tubes.
17.8546	Introducing rod for palliative tubes.

There are 30 dilators from which to choose. Each has a smooth teflon end, malleable in the smaller sizes, ranging from 3 mm to 18 mm in diameter. The handles are clearly marked with the size (French gauge). The complete set, or part set can be fitted into a pocketed linen wrap which is ideal for protection during autoclaving and storage. The 6 sizes of stainless steel intubation tubes can

now be easily fitted using the new flexible teflon introducer tube and rod. Extra long accessories are available and include cleaning rod and brushes for the oesophagoscopes, suction tube and a range of forceps which are shown overleaf.

Four Seward stainless steel instruments for use with Earlam's oesophagoscope.
